

CLIMATE CRISIS SOLUTIONS

This Zero Emission driver is doing a big something to change the future

Every gallon of gas burned in ICE puts 20+ pounds of Climate & Health Changing Pollution into our air.

This is one big reason why we have a climate crisis. An average ICE driver puts +/-4,000 pounds of CCP in the air every year.

Together the Zero Emission Vehicles have saved Billions of pounds CCP.

National Drive Electric Week™

Exclusive automotive sponsor since 2012
Nissan LEAF*owners have driven over 5 billion EV miles globally

Things to Do Now—Today

- 0. Stop thinking Climate Change will be solved by someone else—it won't—it will only be solved by you.
- 1. Change Electric source to wind or solar power
- 2. Eat less meat or go vegetarian or vegan, garden
- 3. If you have an ice car get rid of it and go 100% electric—no hybrids allowed
- 4. Stop all single use plastics—water bottles
- 5. buy organic locally sourced foods
- 6. If you fly, stop buy a Tesla and drive the future.

Things to Work On

- 7. Rooftop Solar or buy into solar projects
- 8. Divest of all fossil fuel stocks, bonds, banks, insurance, pharma, war, weapons, chemicals, e.tc. Go socially green with your investments (Mosaic outside PA).
- 9. If you have yard tools that are gas - replace them with 100% electric equals
- 10. Backup gas generator?
Go with an electric power wall
- 11. Be in alignment and protest.
Demand Climate Action from governments we need a carbon & methane tax now!
Elect people that actually know or respect the science.
(Yes it goes to 11.)
